

# BASQUE GLOBAL NETWORK

A social network to bring the Basque community together worldwide

[CREATE AN ACCOUNT](#)

## Basque Global Network

The Basque Government, through its Secretary-General of Exterior Action, has set up a social network in the Internet called 'Basque Global Network' with the aim of bringing together people who are part of the Basque community abroad, as well as Basque people who have an international profile and others with an affinity for the Basque Country and its people.

The idea is that this Basque social network should be a meeting point for these people and the Basque institutions with a central theme: Euskadi-Basque Country. The start-up of this project is envisaged in the Internationalisation Framework Strategy 2020- Basque Country Strategy. It is a tool that will make it possible for all the members of the network to communicate.

The network has five thematic groups or areas: institutional, commercial, cultural, educational and development cooperation. These areas respond to the different lines of work that the Basque community is currently carrying out internationally. To participate in this network, you need to make an application, identifying yourself, linking yourself to one of these five areas. The languages of the new platform will be Basque, Spanish, English and French, although there are no restrictions on the use of other languages.

In contrast to other social networks, the members of this worldwide Basque can, as well as establishing networks of contacts or creating groups based on common interests, manage and share events, calendars and documents. The idea is that all users of the network can contribute ideas and knowledge and generate interconnections to their mutual benefit in a network of shared interests. Likewise, each member will be able to define his/her level of privacy in the network.
